

FORAGE MAIZE

NEW VARIETIES TO EVALUATE FOR 2017

Correct variety selection can make a huge difference to the success of your maize crop.

Continued evaluation of new varieties is imperative to ensure we offer maize varieties to suit all situations and maximise farm profit.

We are pleased to offer three varieties that we have carefully selected after initial UK breeder trials, these have shown a superior combination of outstanding quality, yield and agronomic characteristics.

Variety	Breeder	F.A.O	Dry Matter %	Yield %
Duxxbury	RAGT	160	37.1	98
LikelT (KXB5010)	DSV/KWS	170	34.3	105
GP CA 56	Caussade	190	33	106

Limited seed availability for new varieties under evaluation.

RGT DUXXBURY

- A new generation of early maturing maize from the same breeder as Agiraxx.
- Exceptionally early maturing with yield.
- Shown consistency in 2 years of National Listing Trials

LikelT

- Showing above average digestibility with high starch yields
- Very uniform and fully filled/enclosed early maturing cobs
- Robust field and agronomic characteristics
- Superior early vigour

GP CA 56

- High yielding mainstream variety with the highest digestibility and energy sources in UK trials
- Very good all round disease resistance
- Large, well formed, mature cob type
- Suitable for forage and biogas production

Thiram & Mesurol treated 50,000 seed packs
