

## Aber<sup>®</sup> High Sugar Grass

- **Innovation, research and technology, for future growth**
- Top ranking ryegrasses on independent Recommended Lists
- Higher D-value (quality) drives increased milk yield or live weight gain per hectare
- Bred at IBERS Aberystwyth University to perform under UK conditions
- Multi-award winning varieties
- Proven to reduce Methane/greenhouse gas emissions
- Research into disease and pest resistance on grassland clover varieties
- Improved tolerances of flooding, drought and nutrient (P & K) use efficiency
- Improving human health aspects of meat and milk consumption

**Your route to higher production from forage**

# AGRICULTURAL GRASS MIXTURES

## HI - D BRITISH BRED (Long Term cutting & grazing)

**Maximum  
Returns Per Acre**

2.0kg	Aber@Green	Intermediate Ryegrass
2.25kg	Aber@Wolf <b>NEW</b>	Intermediate Ryegrass
2.0kg	Aber@Clyde <b>NEW</b>	Intermediate Ryegrass (T)
3.0kg	Aber@Avon	Late Ryegrass
3.0kg	Aber@Gain	Late Ryegrass (T)
0.35kg	Aber@Dai	White Clover
0.40kg	Aber@Herald	White Clover

**No clover option available**

### Benefits

- Now contains Aber@Wolf, highest total grazing, first cut yields and highest grazing D Value, a very dense and prolific variety
- Hi D combines varieties with the highest digestibility available, this produces the highest energy yield (ME) for both grazing and conservation
- Hi D is a unique blend of leading varieties to increase profits per ha
- Heading date range 27th May to 4th June proven to produce optimum yields and persistency under both cutting and grazing
- All varieties selected have higher D Value than 76.7%, which is the average of all recommended varieties improving dry matter intakes
- Premium British White Clovers increase protein levels and palatability

## Aber 100%

- Quality varieties produce a superbly dense and persistent sward
- High scores for **crown rust** and **drechslera**
- Maximum milk, meat production and financial returns per ha
- Aber@Green highest grazing yield and D-value on recommended list, also NIAB cup winner for excellence 2015
- Aber@Clyde exceptionally high full season growth and energy production
- Aber@Clyde Pasture Profit champion 2017 with highest overall ratings per ha.

### Hi D (Ultimate in Grass Performance)

 Aber Advantage	Grazing	Cutting
ME yield of Aber@Hi D	137,668 MJ/ha	184,744 MJ/ha
Average of comparable varieties	129,914 MJ/ha	178,147 MJ/ha
Extra ME yield of Aber@Hi D	7,754 MJ/ha	6,597 MJ/ha
 Aber advantage Milk	<b>1,266 litres/ha</b>	<b>1,282 litres/ha</b>
 Aber advantage Meat	<b>253 kg/ha</b>	<b>340 kg/ha</b>

<b>Sowing Rate (Kg/Acre)</b>	<b>13</b>
<b>Overseeding Rate (Kg/Acre)</b>	<b>10</b>
