

2018

MAIZE & BEET SEED

PRODUCT GUIDE

forage & biogas

MAGNUM

- Well proven consistent palatable
- High Dry Matter yields
- High proportion of root in the ground
- Good frost tolerance

Characteristics

Dry Matter %	19.3
Dry Matter Yield %	108
Fresh Yield %	91
Root in Ground %	75

Colour	White
Rhizomonia Resistant	No
Standard Treatment	Force Magna
Optional Treatment	Gaucho

50,000 seed packs

VIRIDIS

- Clean white shallow rooting beet, high fresh weight yield
- High Dry Matter yields and good frost tolerance
- Strong early vigour and excellent disease resistance
- Rhizominia Tolerant
- **A reliable dual purpose fodder/energy beet**

Characteristics

Dry Matter %	18.6
Dry Matter Yield %	104
Fresh Yield %	103
Root in Ground %	70

Colour	White
Rhizomonia Resistant	Yes
Standard Treatment	Iprodione, Hymexazol & Flurthrin
Optional Treatment	Nuprid

50,000 seed packs

FODDER BEET

CAGNOTTE

- Easily lifted and clean
- High % of root out of ground
- Well suited to late lifting and storage
- Added insurance of Rhizomania resistance

Characteristics

Dry Matter %	17.5
Dry Matter Yield %	100
Fresh Yield %	107
Root in Ground %	65

Colour	White / Yellow
Rhizomonia Resistant	Yes
Standard Treatment	Iprodione, Hymexazol & Flurthrin
Optional Treatment	Nuprid

50,000 seed packs

MERVILLE

- Produces high beet yields
- Good establishment with strong early vigour
- Excellent disease resistance to powdery mildew & rust
- Very low bolting tendency
- Suitable for grazing as well as lifting

Characteristics

Dry Matter %	16.7
Dry Matter Yield %	96.4
Fresh Yield %	105
Root in Ground %	70

Colour	Red
Rhizomonia Resistant	No
Standard Treatment	Iprodione, Hymexazol & Flurthrin
Optional Treatment	Nuprid

50,000 seed packs

SPLENDIDE

- An excellent all round beet
- Very high Dry Matter and Fresh Root Yields
- Excellent for storage and easy lifting
- Highly palatable
- Very large clean orange beet

Characteristics

Dry Matter %	16
Dry Matter Yield %	98
Fresh Yield %	113
Root in Ground %	70

Colour	Orange
Rhizomonia Resistant	No
Standard Treatment	Iprodione, Hymexazol & Flurthrin
Optional Treatment	Nuprid

50,000 seed packs

JAMON

- A well proven consistent variety
- Clean highly palatable large orange roots
- Good resistance to leaf disease and bolting
- Large top size and early to lift
- Lift or graze insitu
- Europes most popular variety

Characteristics

Dry Matter %	16.2
Dry Matter Yield %	99
Fresh Yield %	105
Root in Ground %	67

Colour	Orange
Rhizomonia Resistant	No
Standard Treatment	Iprodione, Hymexazol & Flurthrin
Optional Treatment	Nuprid

50,000 seed packs

GRAZING / ENERGY BEET

MONRO (GRAZING & LIFTING)

- Traditional Mono Germ type of beet
- Exceptional high flesh yields
- Ideal for grazing but can also be lifted
- 60% of root above the ground
- Easy access to root when grazed
- Very good bolting resistance
- Softer / Low dry matter %

NEW FOR 2018

Characteristics

Dry Matter %	14.6
Dry Matter Yield %	90
Fresh Yield %	117
Root in Ground %	40
Colour	Red
Rhizomonia Resistant	No
Standard Treatment	Iprodione, Hymexazol & Flurfhrin

BARENTS (ENERGY)

- Delivers high dry matter with superior energy content
- High Dry Matter yields of high quality for gas production
- High quality plants with very large tops
- Clean well-shaped low-tare roots for easier harvesting
- High quality seed for the best results

Characteristics

Root Dry Matter %	22.5
Root Dry Matter Yield T/ha	20.20
Root Fresh Yield T/ha	89.75
Suger Content %	100
Rhizomonia Resistant	Yes
Standard Treatment	Cruiser, Force, Thiram & Hymexazol

50,000 seed packs

YODA - NEW 2018 (ENERGY)

- Consistently high dry matter yields of high quality substrate, ideal for biogas production
- Exceptionally, clean well-shaped low-tare roots for easier harvesting
- High quality seed that delivers excellent establishment
- Yoda is a true energy beet
- 4% higher dry matter than control
